Projects

Xinboy Sep 2006 – Present  
Educational art-game-storytelling app  
https://github.com/quantumsand/xinboy  
xinboy is an educational art-game-storytelling app. The software is free software licensed under the AGPLv3. The content is creative commons licensed under the CC BY-SA 4.0.

Volunteering

Queen Elizabeth Foundation July 2014  
Assistant Shepperton

References

Mark Jackman, Headteacher, Yateley School

To whom it may concern. Reference for Andrew Potter. Andrew has worked with us for four years now, joining us part time initially and working up to a 0.8 contract latterly. Andrew is a conscientious, willing, polite and cooperative member of our IT support team. He is keen to learn new skills as well as practising his well developed programming skills. He has been responsible for IT support in our fully wireless BYOD environment and has shown himself to be responsive, adaptable and effective in resolving a whole range of issues, such as administering the VLE and VLE outreach, fixing students laptops and problem solving computer and projector issues around the site. He has trained teachers in the use of the VLE. He communicates well with a variety of audiences and has shown himself to be persistent and determined in addressing the concerns of our users. Andrew has used his programming skills to good effect and has designed and built a Ruby-on-Rails (version 5) WebGL 3d Map App of the school which is published on GitHub. He also designed and built a Ruby-on-Rails (version 4) Work Experience database system, which helped our work experience manager immensely. I can recommend Andrew to you without reservation.

Kind regards, Mark Jackman  
Headteacher, Yateley School
